Senior UX Designer focused on simplifying complex, data-rich products through systems thinking, rapid prototyping, and cross-functional collaboration.

Experience

Oracle | Senior UX Designer

July 2023 - Present · Bengaluru
Internship in 2022 led to a full-time UX Designer role in Jul 2023; promoted in Oct 2025

- Led the redesign of how marketers collect real-time data on website visitor activity, simplifying highly technical workflows for business users.
- Designed dashboards for monitoring ML models, then reimagined the experience as a fully agentic AI app that helps marketers uncover insights from customer data.
- Beyond core projects, built and pitched an AI agent that reached the final 12 among 700+ teams; drove the creation of a team-wide UI toolkit; researched and prototyped an AI-driven accessibility solution; and co-lead an upcoming UX event with industry experts.

Earlier Internships · 2021

- WTA Studios - OTT product design across mobile, desktop, and TV
- Anveshan - Website UI and product visuals for a food-tech brand
- Prishni - Brand and website UX for an accessibility-focused edtech platform
